Ceramic **Bandpass Filter**

50Ω 4400 to 5200 MHz

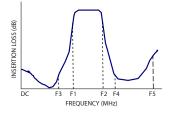

Features

- Good VSWR, 1.2:1 typ @ passband
- Small size (0.126 x 0.063 x .037)
- Temperature stable
- LTCC construction

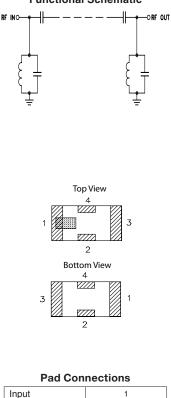

Applications

- · Harmonic rejection
- Telemetry
- Satellite
- Mobile
- · Military and Commercial

-55°C to 100°C

1. Measured on Mini-Circuits Characterization Test Board TB-270. 2. This filter is not intended for use as a DC Blocking circuit element. In Application where DC voltage is present at either input or output ports, blocking capacitors are required at the corresponding RF port.

Additional Notes

- A. Performance and quality attributes and conditions not expressly stated in this specification document are intended to be excluded and do not form a part of this specification document.
- B. Electrical specifications and performance data contained in this specification document are based on Mini-Circuit's applicable established test performance criteria and measurement instructions.
- C. The parts covered by this specification document are subject to Mini-Circuits standard limited warranty and terms and conditions (collectively, "Standard Terms"); Purchasers of this part are entitled to the rights and benefits contained therein. For a full statement of the Standard Terms and the exclusive rights and remedies thereunder, please visit Mini-Circuits' website at www.minicircuits.com/MCLStore/terms.jsp
