

Ultra Low Noise, High IP3

Monolithic Amplifier

PMA2-162LN+

50Ω 0.7 to 1.6 GHz

The Big Deal

- Ultra Low Noise Figure, 0.5 dB
- High Gain, High IP3
- Class 1B HBM ESD (500V)
- May be used as a replacement for MGA-631P8 ^{a,b}

2mm x 2mm

[LTE Performance](#)

Product Overview

Mini-Circuits PMA2-162LN+ is a E-PHEMT based Ultra-Low Noise MMIC Amplifier with a unique combination of low noise and high IP3 making this amplifier ideal for sensitive high dynamic range receiver applications. This design operates on a single 4V supply.

Key Features

Feature	Advantages
Ultra Low Noise, 0.5 dB at 1.0 GHz	Outstanding world class noise figure performance.
High IP3, +30 dBm at 1.0 GHz	Combining Low Noise and High IP3 makes this MMIC amplifier ideal for use in Low Noise Receiver Front End (RFE) as it gives the user advantages at both ends of the dynamic range: sensitivity & two-tone IM performance.
Adjustable Gain	By changing feedback resistor R1, gain can be changed from 19.7 to 23.5 dB at 1GHz
2mm x 2mm 8 lead MCLP Package	Low Inductance, repeatable transitions, excellent thermal contact to PCB
Max Input Power, +25 dBm	Ruggedized design operates up to high input powers often seen at Receiver inputs eliminating the need for an external resistor.
High Reliability	Low, small signal operating current of 55 mA nominal maintains junction temperatures typically below 100°C at 85°C ground lead temperature.
Class 1B ESD (500V HBM)	The PMA2-162LN+ is a super low noise PHEMT based design. Mini-Circuits incorporates ESD protection on die to achieve industry leading ESD performance for a low noise amplifier.

Notes:

- a. Suitability for model replacement within a particular system must be determined by and is solely the responsibility of the customer based on, among other things, electrical performance criteria, stimulus conditions, application, compatibility with other components and environmental conditions and stresses.
- b. The Avago MGA-631P8 part number is used for identification and comparison purposes only.

Notes

- A. Performance and quality attributes and conditions not expressly stated in this specification document are intended to be excluded and do not form a part of this specification document.
- B. Electrical specifications and performance data contained in this specification document are based on Mini-Circuit's applicable established test performance criteria and measurement instructions.
- C. The parts covered by this specification document are subject to Mini-Circuits standard limited warranty and terms and conditions (collectively, "Standard Terms"); Purchasers of this part are entitled to the rights and benefits contained therein. For a full statement of the Standard Terms and the exclusive rights and remedies thereunder, please visit Mini-Circuits' website at www.minicircuits.com/MCLStore/terms.jsp

Ultra Low Noise, High IP3

Monolithic Amplifier

0.7-1.6 GHz

Product Features

- Low Noise figure, 0.5 dB at 1 GHz
- High IP3, 30 dBm typ. at 1 GHz
- Adjustable gain, 19.7-23.5 dB at 1 GHz
- High Pout, P1dB 20 dBm typ. at 1 GHz
- Class 1B HBM ESD Rating (500V)

Typical Applications

- Base station infrastructure
- Portable Wireless
- LTE
- GPS
- GSM
- Airborne radar

PMA2-162LN+

PRICE: \$2.87 ea. QTY. (20)

+RoHS Compliant

The +Suffix identifies RoHS Compliance. See our web site for RoHS Compliance methodologies and qualifications

LTE Performance

General Description

The PMA2-162LN+ (RoHS compliant) amplifier is fabricated using E-PHEMT technology and offers extremely high dynamic range with ultra low noise figure and good input and output return loss. Lead finish is Matte Tin plate. It has repeatable performance from lot to lot and is enclosed in a 2mm x 2mm x 0.55mm package for very good thermal performance.

simplified schematic

Function	Pad Number	Description
RF IN	2	Connects to RF input via C1 and Pad 3 via L1
RF-OUT	7	Connects to RF out via C2, Pad 5 via R1, and C3
RF-Ground	3	Connects to ground via C4 and Pad 2 via L1
Bias	4	Connects to Supply voltage (Vs) via Rbias
Feedback	5	Connected to pads 7, 4 via R1 and C3
No Connection	1,6	Not used internally. Pin 1 Connected to ground on test board
Ground	8 & paddle	Connects to ground

Notes

- A. Performance and quality attributes and conditions not expressly stated in this specification document are intended to be excluded and do not form a part of this specification document.
B. Electrical specifications and performance data contained in this specification document are based on Mini-Circuit's applicable established test performance criteria and measurement instructions.
C.
